

Genetics

Across

- Two different allele for a trait **heterozygous**
- The genetic makeup of an organism **genotype**
- A trait that is covered over by another form of the same trait **recessive**
- Offspring of mixed ancestry **hybrid**
- Outward appearance of an organism **phenotype**
- An alternate form of a gene **allele**
- Offspring of the same ancestry **purebred**

Down

- A trait that covers over another form of that trait **dominant**
- A chart showing a trait through generations of a family **pedigree**
- Two allele that are the same for a trait **homozygous**
- A tool used to predict the probability of certain traits in an offspring **Punnett_square (NO SPACE)**
- The passing of traits to the offspring from the parents **heredity**
- The study of how traits are inherited **genetics**
