

## Living Things Have Needs

*Cactus Hotel* by Brenda Z. Guiberson

*Nature in the Neighborhood* by Gordon Morrison

*Polar Wildlife* by Khanduri, Kamini

*Our Three Bears* by Ron Hirschi

These are just some suggestions of books. There are many out there that you could choose from.

What to do:

- Read a story that illustrates an animal having a relationship with the environment. Investigate this relationship between the animal's characteristics and the features of the environment where it lives.
- Complete a graphic organizer of the main idea and details of the book that illustrates how the animal's needs are met by the environment where it lives.

GLE 0207.5.1 Investigate the relationship between an animal's characteristic and the features of the environment where it lives.
