

<p>Name the Three States of Matter.</p> <p>(Answer: Solid, Liquid, Gas)</p>	<p>The state of matter with particles very far apart, and moving quickly.</p> <p>Answer: Gas</p>
<p>The process in which matter changes from a liquid to gas.</p> <p>Answer: Evaporation.</p>	<p>As the average temperature of matter decreases, it may change from a liquid to a...</p> <p>Answer: Solid</p>
<p>The process in which matter changes from a gas to a liquid.</p> <p>Answer: Condensation</p>	<p>As the average temperature of matter increases, it may change from a liquid to a...</p> <p>Answer: Gas</p>
<p>The state of matter with particles moving around a fixed point.</p> <p>Answer: Solid</p>	<p>As the average temperature of matter increases, it may change from a solid to a...</p> <p>Answer: Liquid</p>
<p>The state of matter with particles slipping and sliding past one another.</p> <p>Answer: Liquid</p>	<p>As the average temperature of matter decreases, it may change from a gas to a...</p> <p>Answer: Liquid</p>

As water particles in clouds begin to cool, they join with other particles. This is called _____.

Answer: condensation

As water particles warm and escape to the sky, this process is called_____.

Answer: evaporation
